Scorpion Track 5 offers the following benefits

- Unit is provided with 2 Driver Recognition Cards as standard but can accept up to 10.
- Unauthorised movement alerts – we will call if the vehicle is moved without a Driver Recognition Card present.
- Tow away alert – triggers if the vehicle is moved without keys in the ignition.
- Battery tamper and low battery alerts.
- Secure Operating Centre manned 24 hours a day 7 days a week.
- Secure Operating Centre staff will liaise with the police on your behalf in the event of your vehicle being stolen.
- Text alert if the Driver Recognition Card battery runs low.
- Facility for remote immobilisation of the vehicle in an emergency situation.
- Full European coverage.
- Flexible Subscription options between 1 and 4 years.
- 3 Year warranty
- Location on demand via web or smartphone.

Pre-conditions

The system is sold with 2 rechargeable Driver Recognition Cards and desktop charger as standard and the driver will need to carry one of the Driver Recognition Cards whenever driving the vehicle. In the event that a card is not present when the vehicle is driven, our Secure Operation Centre will contact the driver and once their identity has been confirmed, will determine whether a theft is in progress.

The **ScorpionTrack 5** is supplied with 2 stylish, piano black, Driver Recognition Cards. These cards set the industry standard and are fully rechargeable using the desktop charger.

Driver Cards

The lightweight Driver Recognition Card is a discreet and stylish accessory to our Insurance Approved, Thatcham CAT 5, GPS stolen vehicle recovery system.

Who we are

Scorpion Automotive Ltd is a UK based electronics manufacturer specialising in vehicle security and safety systems. The Scorpion range of products includes Toad and Sigma alarms and immobilisers as well as the Scorpion range of GPS tracking and fleet products. With the worldwide automotive standard, ISO/TS 16949, Scorpion Automotive boasts an enviable portfolio of O.E. products supplied to manufacturers including Aston Martin, Subaru, Iveco, Toyota and DAF Trucks. This production is backed up by our highly experienced, in-house research and development team along with our own programming department also based right here in the UK.
